

Git & Github

Marar badan waad maqashay Git & GitHub, note-kan yar wuxuu kaa caawinayan in aad fahanto waxa uu yahay iyo sida loo isticmaalo(Basics)

1. waa maxay git?

- Git waa tool kaa caawinaayo in aad la socotid is bedelada project-ga aad dhiseysid(sida code, files)
- wuxuu kuu ogolaanayaa in aad dib uga laabato versionki / is bedelki hore ee project aad ku sameyse.

2. Waa maxay github?

- Github waa website kaas oo ku keydsan karto Projectska aad dhistay (online)
- wuxuu kaa caawinayaa in aad la wadaagto dad kale project-gaada iyo in aad team ku wada shaqeyn kartaan.
- U faham Git inuu yahay sida notebook 📓 oo kale, halka github uu yahy Google drive oo kale

3. Sidee ku ogaan kartaa in uu ku jiro computerka?

- soo fur **terminal**-ka / ama **cmd** kadib ku qor **git --version**
- hadii uu kuu soo saaro number wuu kugu jiraa hadii kale kaso dejiso **<https://git-scm.com/downloads/win>**

4. Sidee loo setup gareeyaa marka ugu horeyso?

- in aad u sheegto magacaada iyo emailka (this helps to recognizing commits you made)?
- **git config --global user.name "Your Name"**
- **git config --global user.email "Your Email"**

5. Marka aad Project dhisi rabto (steps & commands)?

Option A: in aad project cusub bilowdo

- **git init** tani waxay abuureysaa **git folder** proejectga gudahiisa (*command ugu horeeyo aad isticmaaleyso mar walba aad project dhiseyso*)

Option B: Clone / copy a project from gthub to your computer

git clone [URL link of repository] halkan waxaad ku bedelaysaa linkga repositoryga github.

6. Commands aad isticmaaleyso inta badan

Step 1. Check status

git status in aad aragto is bedelka dhacay, kuwa lagu soo daray ama filesha u baahan commit (save)

Step 2. ku dar is bedelka aad sameyse git

git add *file-name1 filename2* in aad sheegtid filesha aad ku dareysid mid walba.

hadii aad rabto dhamaan filesha inaad hal mar ku dartid isitcmaal **git add .**

Step 3. Save the change

git commit -m "write here the description of what changes you have made.."

step 4. Send to github

github ku upload gareey

git push origin main

7. Sidee looga arkaa is bedeladi hore (old commits)?

git log // display the previous commits your made in git

Go back to an older commits

git reset --hard <commit-id>

Download the latest changes from github(command)

tani waxaa loo isticmaala marka aad team ku wada shaqeyneysaan ee update ay ku sameeysaan project in aad soo dejisato updateka la sameeye. isticmaal **git pull**

Fg. Halkan kuma koobna intan waa **Basic**, Hadii aad rabto in aad wax badan ka ogaato waad sii baari kartaa.
